

# CUBEON

## TECHNOLOGIES

We have worked with numerous clients across various industries to fulfil their business requirements. Our expertise primarily includes ERP systems, CRM solutions, custom web applications, websites, eCommerce platforms, and CMS development.

We use different technologies based on each client's specific requirements, including MERN, MEAN, .NET, PHP, Shopify, and Python frameworks such as Django, Flask, and Tkinter.

Below are a few examples from our portfolio — feel free to check them out.

### 1. Project Name

#### **Custom Canvas Printing Platform**

Built a personalization-first platform where users can create photo frames using single-image, multi-image (up to 9 frames), split-frame, and custom layout options. The solution includes frame style and size selection, real-time 2D/3D preview of final product, order and cart management, secure payment processing, real-time price calculation, and robust image upload workflows.

Tech Stack: **React.js, Node.js, Express.js, MongoDB, React Query, Redux Toolkit, Formik, Yup, Three.js, Tailwind CSS, Razorpay, PhonePe, Multer, Redis, AWS S3**

### 2. Project Name

#### **The Gold King Australia — Luxury eCommerce Website**

<https://www.thegoldking.com.au/>

Built a premium Shopify-based eCommerce platform for a gold and precious metals business with a strong focus on luxury branding, responsive UI, secure payments, and conversion optimization. Implemented analytics, marketing automation, CDN optimization, and mobile-first performance enhancements to improve customer engagement and online sales.

Tech Sack: **Magento, mysql, Figma etc.**

### 3. Project Name

#### **Luxury Interior & Furniture E-Commerce Platform**

<https://www.mooodi.com/en/>

A premium modern furniture and interior décor platform inspired by the immersive experience of [Mooodi](#).

The website combines storytelling, high-end visuals, editorial layouts, and seamless e-commerce functionality to create a luxury digital shopping experience.

The platform is designed for showcasing designer collections, curated spaces, product storytelling, and online purchasing while maintaining ultra-fast performance and cinematic UI interactions.

Tech Stack: **Next.js, React.js, Node.js, Express.js, MongoDB, AWS, SEO & Performance**

### 4. Project Name

#### **Karin Herzog Luxury Skincare E-commerce Website**

[www.karinherzog.com](http://www.karinherzog.com)

Developed and maintained a premium skincare e-commerce platform focused on luxury branding, responsive UI/UX, product showcasing, and optimized online shopping experience. Implemented modern frontend technologies, SEO optimization, analytics integration, and performance enhancements to improve customer engagement and conversions.

Tech Stack: **React.js, Node.js, MongoDB, Express.js**

### 5. Project Name

#### **Financial Asset Management Modernization**

Transformed a legacy VB6/.NET desktop system into a scalable web platform featuring 250+ dynamic interconnected forms, role-based access control with granular permissions, and real-time data synchronization via sockets without full page reloads or re-open forms.

Tech Stack: **Next.js, Node.js, Express.js, MongoDB, React Query, Redux Toolkit, Tailwind CSS, Redis, BullMQ, Formik, Yup, Socket.io, REST APIs, JWT Authentication**

## 6. Project Name

### **E-Commerce Paint & Decorating Store**

#### **[Home - ColourX](#)**

Developed a modern e-commerce platform for a Canadian paint and decorating retailer offering paints, spray equipment, wallpapers, tools, primers, stains, and contractor supplies. The platform enables customers to browse colour collections, shop products online, explore paint solutions, and locate nearby stores across the GTA region.

Tech Stack: **PHP, Bootstrap, MySQL, Cloud, Figma**

## 7. Project Name

### **Coffee Operations and Inventory Platform**

Testing Library Developed an operations-focused platform to manage order placement, stock monitoring, automatic replenishment flows, and integrated payment processing, improving both operational efficiency and user experience

Tech Stack: **React.js, Node.js, Express.js, MongoDB, React Query, Redux Toolkit, Razorpay, MUI, Storybook, Jest, react**

## 8. Project Name

### **Human Resource Management System**

Built an HRMS platform with modules for employee onboarding, attendance tracking, leave management, payroll processing, performance evaluation, and role-based access control. The solution includes real-time dashboards, reporting tools, document management, and secure authentication to improve operational efficiency, data accuracy, and HR decision-making

Tech Stack: **Next.js, React.js, Node.js, Express.js, PostgreSQL, Redux Toolkit, Tailwind CSS, REST APIs, JWT Authentication**

**Thanking you**
