our methodology your comfort

Customer satisfaction by early and continuous delivery of valuable software

Welcome changing requirements, even in late development

Close, daily cooperation between business people and developers

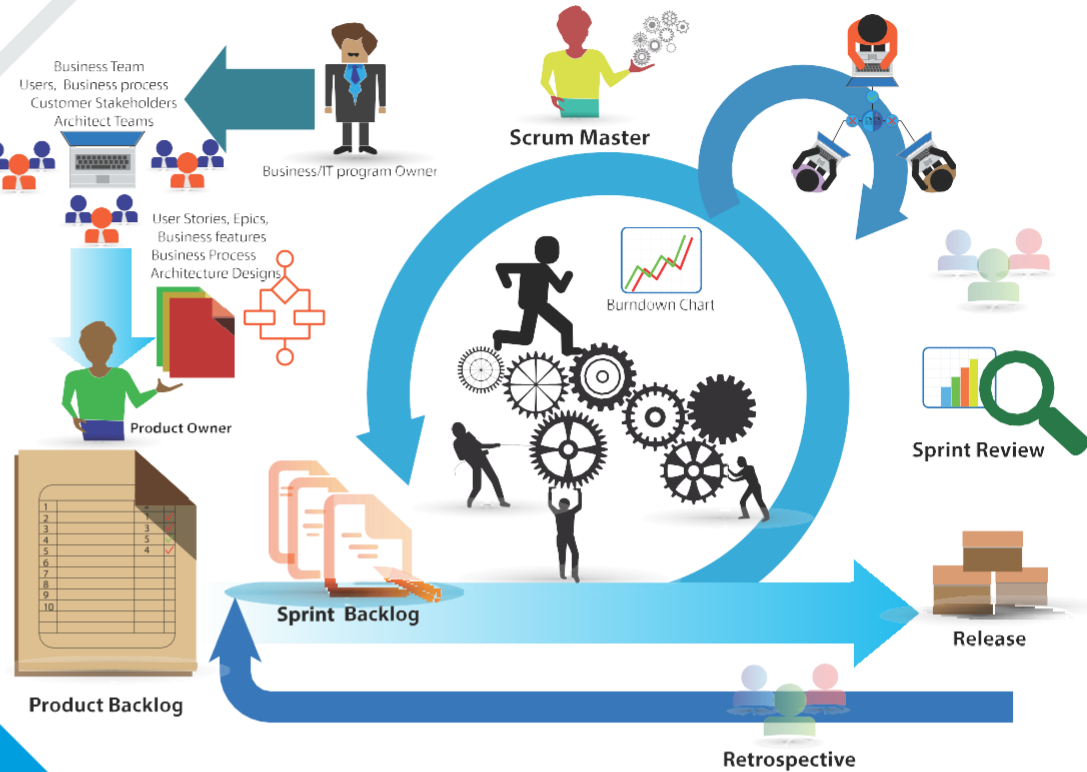

Projects are built around motivated individuals, who should be trusted

Working software is the principal measure of progress

Face-to-face conversation is the best form of communication (co-location)

Working software is delivered frequently (weeks rather than months)

Sustainable development, able to maintain a constant pace

Most customers who contact us about their idea don't know where to begin. If this is you, don't worry! We have created a process that is easy to understand and follow and we will be the leader for you throughout.
